We at On Time Buildings are endeavor to meet challenges, set higher goals and strive intelligently to achieve them. We are dedicated and thrive to preserve high human values with a continuous thirst for new technology to upgrade the lifestyles of our consumers.

WELCOME

On Time Buildings portable cabins and Prefab Houses provide consumers and businesses with easy access to portable structures. The company has developed a very efficient means to handle construction and delivery of functional prefab buildings.

WHY PRE FAB

- Affordable - cost savings, attractive and durable.
- Quick construction.
- Prefabricated components speed up construction time, resulting in lower labour costs.
- Prefabrication allows for year round construction.
- Work is not affected by weather delays (related to excessive cold, heat, rain, snow, etc.)
- There are less wasted materials.

We have established the most innovative assembly system which provides fast and easy construction of a Portable structures and Prefab Houses.

We serve all kinds of portable cabins and Prefabricated buildings bringing design, engineering, production and other capabilities to customers.

The internal structure of the prefab buildings is very sturdy and strong. The base of the portable building has been made heavy with steel frame as well as concrete in order to maintain stability. This is important in case a strong wind or force hits the side of the building, it would not be displaced or pushed away.

It is made from the most durable materials available in the market. This would include LGSF(Light gauge steel Frame) and heavy duty cement boards, plywood, and steel. This is necessary in order to ensure the safety of consumers staying inside the portable buildings.

The structural integrity of the Prefab homes is very sturdy. It can be reinforced with metal poles and bars to enhance the stability of the whole.

Best economic solution for Your dream.
